

## **Appendix 13**

### **TCM Timely Implementation**

**Appendix 13:  
Transportation Control Measures**

A Transportation Control Measure (TCM) commitment is a transportation investment or activity in the State Implementation Plan (SIP) designed to reduce on-road vehicle emissions. Failure to demonstrate timely implementation of TCMs contained in the SIP can result in disapproval of our air quality conformity determination. All emissions are calculated using Texas mobile source emissions reductions strategies (MoSERS) and emissions factors from MOBILE6. Note this appendix demonstrates timely implementation of TCMs, but TCM emission credits are applied to this conformity. Please refer to the individual project listing for more information on these TCMs.

**Organization of this appendix:**

MPO ID	Sequential unique number given to all projects used for identification by H-GAC that corresponds to the GIS and modeling networks and RTP.
Sponsor	Sponsor Agency usually the agency submitting project and providing matching funds.
Street	Street/Highway where project is located. If project is not located on a specific facility then VA or N/A is listed for street.
From Limit/To Limit	Beginning and ending limits of the project
Project Description	Scope of work or description of project as submitted by the sponsor.
Total Cost	Total project cost including all funding sources (federal, state, local)
Length	Length in miles of project
Completion Date	Date project was completed
VOC	Volatile organic compound (kg/day)
NOx	Nitrogen oxide (kg/day)
Project Notes	Specific notes about the project.
