

**AMENDMENTS TO THE 2021-2024 TRANSPORTATION IMPROVEMENT PROGRAM  
(TIP) AND 2045 REGIONAL TRANSPORTATION PLAN (RTP)**

**Summary**

- Program 4,712,000 Transportation Development Credits (TDCs) in lieu of matching funds on fourteen (14) Metropolitan Transit Authority of Harris County (METRO) and Houston-Galveston Area Council projects funded with federal Congestion Mitigation and Air Quality (CMAQ). These federal funds for these projects were originally programmed during the development of the 2021-2024 Transportation Improvement Program.
- Delay three (3) projects from the TIP into FY 2025 of the Houston-Galveston Area Council's Ten-Year Transportation Plan (10Y) at the Texas Department of Transportation's request to fiscally constrain the 2021 Statewide Transportation Improvement Program (STIP).
- Move the FY 2021 Metro Regional Vanpool project, funded with federal Surface Transportation Block Grant (STBG) funds, from the TIP into the Texas Department of Transportation's (TxDOT) Statewide Program for transit improvements (under a statewide Control-Section-Job number) at the TxDOT's request to fiscally constrain the 2021 STIP.

**Action Requested**

TPC approval of Resolutions 2021-09 and 2021-10.

Other Regionally Significant Project

### Please explain how the use of TDCs will help meet the priority established for this project.

Other regionally significant projects decrease vehicular congestion through strategies such as HOV/HOT lanes, Park and Ride facilities and services, expanded express bus services, commuter rail, and travel demand reduction through vanpooling, carpooling, teleworking and other trip reduction strategies. Marketing, outreach, and public education are required to help travelers know that these options exist and to help shift behavior towards these options.

### Roadway, Transit, or Other Project?

Other Project

### Explain and document how TDCs will advance the regional goals established in the Regional Transportation Plan, i.e. Improve Safety, Move People and Goods efficiently, Achieve/Maintain State of Good Repair, Strengthen regional Economic Competitiveness, and Conserve and Protect Natural and Cultural Resources.

Travel Demand Management marketing, outreach and public education both help move people and goods efficiently and protect natural resources by educating organizations and those who live and work in the region about the different transportation and travel options that are available and their benefits. TDM marketing and outreach efforts help shift behavior away from single occupancy vehicles traveling similar routes and times toward more efficient management of our transportation network and improved air quality.

### TDC Priority

Other regional transit projects decrease vehicular congestion, such as HOV/HOT lanes, Park and Ride facilities and services, expanded express bus services, commuter rail, and travel demand reduction through vanpooling, carpooling, teleworking and other trip reduction strategies. Ride-matching and trip-planning systems allow travelers to match to one another to develop new vanpools and carpools, fill seats on existing vanpools and carpools and match to bus, rail, bike, pedestrian and other first mile/last mile options to complete their trip. These systems can also support safe routes to school with walking school buses and ride-matching for parents and their students.

Ride-matching and trip-planning software, in helping create and support shared mobility, allow us to move people and goods more efficiently in our region, reducing vehicle miles traveled and extending the life of our highways, roadways and other infrastructure. The reduction in miles traveled also help to conserve and protect natural resources by improving air quality through reducing pollutants like CO2 and NOx.
