Monday, November 10, 2008

1:30 PM to 3:30 PM

Bacteria Research Presentations

- Best Management Practices for Pathogen Control. Dr. Hanadi Rifai, University of Houston. Several types of BMPs in the Houston area have been sampled during storm events to determine their effectiveness for controlling pathogens in runoff. The results from the sampling will be presented and discussed.
- Population Dynamics of E. Coli and Enterococcus spp. Bacteria in Buffalo Bayou and Whiteoak Bayou. Dr. Robin Brinkmeyer, Texas A&M University at Galveston. A number of studies are being conducted to determine whether E. Coli and Enterococcus bacteria are replicating outside of their animal host, i.e., in the water column and sediment of the bayous. The results from the studies will be presented and discussed.
