

**MAINTENANCE PROJECTS FUNDED BY  
AMERICAN RECOVERY AND REINVESTMENT ACT (ARRA) FUNDS**

**Background**

Information concerning the eligibility of off-system maintenance projects to be by ARRA dollars was presented to the Technical Advisory Committee (TAC) at its May meeting. As a result, the TAC recommended that off-system maintenance projects be considered for inclusion on the contingency list of the MPO selected ARRA funded projects.

Recommendations by the Technical Advisory Committee (TAC) were presented to the Transportation Policy Council (TPC) at its May meeting. The TPC agreed with TAC's recommendations and directed H-GAC staff to develop selection criteria to develop a call for projects for off-system maintenance projects that may be funded by ARRA dollars in the event of cost under runs or additional ARRA funding from other regions in Texas or the country.

**Current Situation**

Staff is working with TPC Officers to develop selection criteria to develop a call for projects in advance of the June TPC Meeting.

**Requested Action**

For information only.
