

**Summary of Toll Projects in the Draft 2011-2014 Transportation Improvement Program (TIP) and the Draft 2035 Regional Transportation Plan (RTP) Update**

The 2035 Regional Transportation Plan (RTP) includes a number of proposed toll projects in a several counties. Some of those projects or phases of the projects are included in the 2008-2011 TIP. Currently, H-GAC is developing a Draft 2035 RTP Update and a Draft 2011-2014 TIP. As part of the development process, H-GAC is trying to confirm the status of each of the toll projects. The lists below reflect H-GAC’s understanding of the current status of the tolling projects included in the 2035 RTP adopted in October 2007. This list is preliminary and subject to change as more information regarding the status of projects becomes available.

SB 792, enacted in 2007, gives county tolling authorities the right to exercise primacy over tolling projects in their counties. The bill identified SH 99 and nine other tolling projects as having local primacy. In addition, the bill specified that county tolling authorities have the first option on toll projects located within or partly within their counties. Project sponsors are local tolling entities unless the counties have stated that they do not wish to exercise primacy.

*Note: Appendix D details projects that are undergoing environmental work. The appendix is for information only. P,S&E is an acronym for Plans, Specifications and Estimates.*

**SH 99 Projects:**

FACILITY	LIMIT	CO.	DRAFT TIP/WORK PHASE	DRAFT RTP/WORK PHASE	LETTING YEAR (PSE)/CONSTRUCTION
Seg. A	IH 146 to IH 45S	GAL	No	No	Not toll viable – improvements on other alignments (i.e., FM 646)
