

Public Outreach for 2045 RTP

Background

The 2045 Regional Transportation Plan (RTP) will establish regional priorities to manage, maintain, and expand our multimodal transportation networks to support our regional goal of providing safe and efficient transportation system which will sustain our region's economic competitiveness and quality of life.

Current Situation

Public outreach is a key component of the RTP development process. As part of the public involvement process, H-GAC staff announced an initial series of public meetings as shown in the attached schedule with at least one meeting scheduled in each of the eight county Metropolitan Planning Area. The purpose of the meetings is to educate participants on current and future transportation challenges and listen to their concerns and recommendations for transportation priorities.
