TxDOT Bicycle and Pedestrian Data Project

TxDOT Project 6927 Evaluation of Bicycle and Pedestrian Monitoring Equipment to Establish Collection Database and Methodologies for Estimating Non-Motorized Transportation

Robert J. Benz, P.E.

Texas A&M Transportation Institute

HGAC Bicycle and Pedestrian Subcommittee Meeting Update

July 19, 2018

Presentation Take Away

- TxDOT online visualization interface
 - TxDOT Maintained Database
 - Ability to take multiple count types (bike, ped, combined)
 - Multiple count intervals (15 and 60 minutes)
 - Multiple vendors formats
- Need agency assistance with gathering count data
- Standardized count and site information

Project 0-6927 Objectives

- Recommend statewide monitoring process for pedestrians and bicyclists
 - Assess equipment, approaches, process in 2 TxDOT Districts
 - Evaluate crowdsourced data
 - **Compile existing and project-collected data into consolidated database**
 - Create sustainable process for city/MPO submittals

Need for standardization

Use FHWA Guide to standardize

- FHWA Traffic Monitoring Guide, 2016

- TMG is submittal/exchange format, not storage format

[illegible]

TMG Limitations

- TMG does not include all attributes desired by TxDOT, such as
 - TxDOT District
 - City/Area
 - Site Name
 - Cardinal Travel Direction
 - Data Owner and Provider Contact Name, Email, Phone

TxDOT Count Database

- Uses same TMG data attributes, but...
- Adds extra data attributes
- Uses relational database structure rather than fixed-column text format
