

11B. 2022 Future of Work Survey Results

BACKGROUND

In 2020 The Houston-Galveston Area Council's Commute Solutions program launched an Employer Survey on Covid-19 Impact to better understand how company operations changed during the pandemic. This year we launched a follow-up survey to learn how organizations plan to work moving forward, the [Future of Work Survey](#).

This survey takes a new look into the impacts of Covid-19 on worksites. The data gathered shows how organizations operated before the pandemic, how they are operating now, and what they envision the workplace to look like moving forward. In addition, the survey looks at benefits offered such as transit subsidies and work from home allowances. H-GAC's Commute Solutions team, in partnership with a small consultant team from AECOM, worked to distribute the survey to employers large and small across the eight-county region. 193 employers replied.

CURRENT SITUATION

The survey results have been shared with the survey participants and are available online in an interactive report [HERE](#). For additional information on the Future of Work Survey, please contact Francis Rodriguez, Senior Program Coordinator at Francis.rodriguez@h-gac.com or at 713-993-2437.
