# Regional Transit Coordination Subcommittee

Thursday, October 9, 2025

# Meeting Agenda

1. Introductions and Certification of Quorum (9) – James Oliver, Island Transit, Chair
2. Public Comments
3. Action Items:
  - 3.1 Approval of RTC Subcommittee Meeting Minutes of July 10, 2025
4. Information Items:
  - 4.1 FIFA World Cup Planning Services – Heng Wang, H-GAC Staff and Koushik Arunachalam, Arcadis
  - 4.2 Regional Public Transportation Coordination Plan (RPTCP) – Bennie Chambers, H-GAC Staff
  - 4.3 Congestion Management Plan (CMP) Interim Update – Alan Rodenstein, H-GAC Staff
  - 4.4 Dayton Transit Plan – Alan Rodenstein, H-GAC Staff
  - 4.5 US 90A Transit Corridor Study – Thomas Gray, H-GAC Staff
5. Transit and Human Service Agency Reports
6. Adjourn

# 1. Introductions, Roll Call, and Certification of Quorum

2025 Regional Transit Coordination Subcommittee

Representing	Primary First Name	Primary Last Name	Organization	Alternate First Name	Alternate Last Name	Organization

## 2. Public Comments

- Please click the small “hand” icon at the bottom of your screen to raise your hand in order to be recognized to speak.

# **3.1. Action Item - Approval of RTC Subcommittee Meeting Minutes of July 10, 2025**

(The minutes of the July 10, 2025 meeting minutes are contained in the packet emailed to Subcommittee members)

# 4.1. FIFA World Cup Planning Services

Heng Wang, H-GAC Staff  
Koushik Arunachalam, Arcadis

# FIFA 26 Houston

Regional Transit Coordination  
Subcommittee (RTCS)

Stronger Together

# Agenda

- H-GAC FIFA World Cup Scenario Planning - Project Overview and Schedule
- Stakeholders Overview
- Regional Transit Agencies
- Mobility Concept - Overview
- Role of Regional Transit During FIFA World Cup
- Our Ask For H-GAC FIFA World Cup Scenario Planning

# Houston Venue Matches (248 Days Away!)

The background of the slide is a nighttime photograph of NRG Stadium in Houston, Texas. The stadium's distinctive white, ribbed roof is illuminated, and the 'nrg stadium' logo is visible on the building's facade. The city lights of Houston are visible in the background under a dark sky.

**FIFA**

**HOUSTON  
MATCH SCHEDULE**

<b>6/14/26</b>	<b>- GROUP STAGE</b>	<b>(Sun)</b>
<b>6/17/26</b>	<b>- GROUP STAGE</b>	<b>(Wed)</b>
<b>6/20/26</b>	<b>- GROUP STAGE</b>	<b>(Sat)</b>
<b>6/23/26</b>	<b>- GROUP STAGE</b>	<b>(Tue)</b>
<b>6/26/26</b>	<b>- GROUP STAGE</b>	<b>(Fri)</b>
<b>6/29/26</b>	<b>- ROUND OF 32</b>	<b>(Mon)</b>
<b>7/4/26</b>	<b>- ROUND OF 16</b>	<b>(Sat)</b>

# Project Overview & Schedule

## H-GAC FIFA World Cup Scenario Planning

**Task 1**  
Project Management, Stakeholder Engagement, Data Collection

- NTP
- Project Management Plan
- Stakeholder Engagement & Communication Plan
- Kick-Off Meeting
- Data Collection Plan
- Stakeholder Engagement
- Bi-Weekly Progress Updates

**Task 2**  
Identify Factors, Performance Measures, Define Scenarios

- Identify Major Variables / Drivers
- Big Data (LOCUS) Analysis for Similar Events
- Develop Factors & Thresholds for Major Drivers
- Identify Performance Measures
- Define Scenarios & Select Scenarios for Modeling
- Scenario Report

**Task 3**  
Transportation Modeling

- Travel Demand Model: Weekday & Weekend Baseline
- LOCUS Analysis: Develop FIFA 2026 Event Trip Details
- Mesoscopic Modeling: Assign Baseline + Event Trips
- Submit Preliminary Model and Results to H-GAC
- Refine Models Based on Event Details, Strategies & Feedback
- Modeling Results Report

**Task 4**  
Evaluate & Refine Traffic Solutions

- Develop Draft Digital Tool
- Preliminary Traffic Recommendations & Strategies
- Integrate Feedback from Stakeholders & Refine Plan
- Develop Final Traffic Recommendations & Strategies
- Traffic Recommendation Report
- Submit Final Digital Tool

**Task 5**  
Post-Event Summary

- Integrate and Refine Feedback Game to Game
- LOCUS Data Summary for FIFA 2026 Event Performance
- Post-Event Recommendations Report
- Project End

**We are here**

## Stakeholders

- ❖ Houston Host Committee
- ❖ Houston Airport System (HAS)
- ❖ Houston METRO
- ❖ Houston TranStar
- ❖ NRG Stadium
- ❖ TxDOT Houston District
- ❖ City of Houston
- ❖ Houston Police Department
- ❖ Harris County Sheriff's Office
- ❖ Harris County
- ❖ Fort Bend County
- ❖ Brazoria county

- ❖ Montgomery County
- ❖ The Woodlands Township
- ❖ City of Conroe
- ❖ Harris County Toll Road Authority
- ❖ City of Sugar Land
- ❖ Greater Houston Partnership
- ❖ Downtown Houston Management District
- ❖ East End District
- ❖ Uptown Houston District
- ❖ H-GAC

## Regional Transit Agencies

- ❖ Galveston Island Transit
- ❖ Harris County Transit
- ❖ Houston METRO
- ❖ Brazos Transit
- ❖ Conroe Transit
- ❖ Colorado Valley Transit
- ❖ Gulf Coast Transit District
- ❖ Fort Bend Transit
- ❖ Woodlands Township

# Mobility Concept – Quick Review

Host City Spectator Parking & Transit Demand Matrix			- please add detail in white cells only - please insert lines or change mode options as needed for your city	
Host City: HOUSTON		Net Ticketed Stadium Capacity: 57,786		Date:
Mode	Mode %	Number of Spectators	Stadium Transport Node	Node %
<b>Transit</b>	<b>42%</b>	<b>24000</b>		<b>42%</b>
Rail				0%
Light Rail	42%	24,000	1-Stadium Park	42%
Subway		0		0%
Bus/BRT				0%
Streetcar/Tram		0		0%
Rail Shuttle		0		0%
<b>Auto - Self Drive</b>	<b>38%</b>	<b>21860</b>		<b>38%</b>
Parking	19%	11000	NRG lots	19%
Accessible Parking	1%	660		1%
Parking Entrepreneurial	6%	3500	all around NRG exterior	6%
Park & Ride - 1	4%	2400	Addicks	4%
Park & Ride - 2	4%	2100	Kuykendahl	4%
Park & Ride - 3	4%	2200	Northwest Station	4%
<i>*Planning ratio of passengers to each car is 2.5</i>				
<b>Rideshare</b>	<b>9%</b>	<b>5000</b>		<b>9%</b>
E-Hail (i.e. Uber)	9%	5,000	Yellow lot 35,38	9%
Taxi				0%
<b>Active</b>	<b>1%</b>	<b>500</b>		<b>0.008652615</b>

Walk	1%	500		1%
Scooter				0%
<b>Totals</b>	<b>89%</b>	<b>51360</b>		<b>89%</b>

**Note:**

11% discrepancy based on the 57k spectators (FIFA Estimated), in which the committee is continuing to work through

# Mobility Concept – Quick Review

INGRESS

EGRESS

**Note:** Percentages in column B for arrivals are pulled from Tab 1. Please add in the numbers in columns C, D, E that your HC is able to move - the approximate %s in row 5 are estimates to guide you.

Spectator Arrivals to the Stadium					
<i>this column should include the rolled up mode headings only</i>	<i>this column total should = 100%</i>	<i>this column should = approximately 20% of the mode total</i>	<i>this column should = approximately 50% of the mode total</i>	<i>this column should = approximately 30% of the mode total</i>	<i>this column total should = the the number of spectators per mode as per tab 1</i>
Mode	Mode Split	-3 Hours	-2 Hours	-1 Hours	Total
Transit	42%	4,800	12,000	7,200	24,000
Auto - Self Drive	38%	4,372	10,930	6,558	21,860
Rideshare	9%	1,000	2,500	1,500	5,000
Active	1%	100	250	150	500
<b>Total</b>	<b>89%</b>	<b>10,272</b>	<b>25,680</b>	<b>15,408</b>	<b>51,360</b>

**Note:** Please be aware that your departure %'s from the stadium may not be the same as the arrivals - some spectators will depart using a different mode, especially in relation to ride-share. Planning assumptions will be provided to you in early 2025.

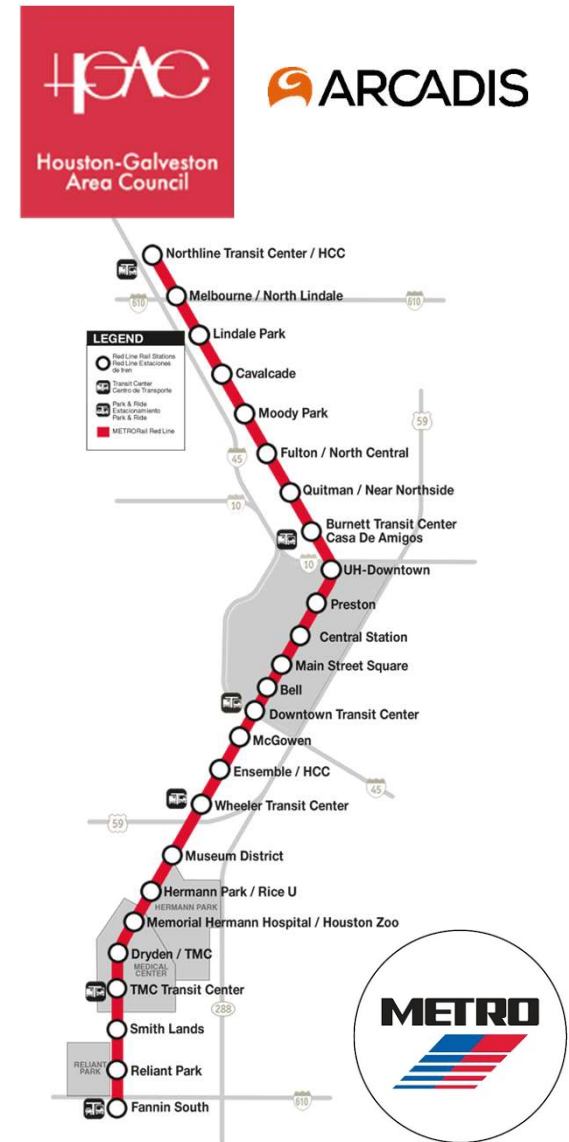

Spectator Departures from the Stadium					
<i>this column should include the rolled up mode headings only</i>	<i>this column total should = 100%</i>	<i>this column should = approximately 70% of the mode total</i>	<i>this column should = approximately 25% of the mode total</i>	<i>this column should = approximately 5% of the mode total</i>	<i>this column will = the number of spectators per mode</i>
Mode	Mode Split	-3 Hours	-2 Hours	-1 Hours	Total
Transit	42%	16,800	6,000	1,200	24,000
Auto - Self Drive	38%	15,302	5,465	1,093	21,860
Rideshare	9%	3,500	1,250	250	5,000
Active	1%	350	125	25	500
<b>Total</b>		<b>35,952</b>	<b>12,840</b>	<b>2,568</b>	<b>51,360</b>

## **Role of Regional Transit During FIFA World Cup**

# Houston METRO - Key Insights

- **Airport–Downtown service:**
  - Current: every 30 minutes
  - FIFA plan: 15-minute frequency to start from holiday season
- **Red Line operations:**
  - Plan 6-minute frequency, 2-car trains, 400 passengers per trip
  - Active 3 hours pre-game to 2 hours post-game
- **Transit mode share:**
  - Updated FIFA Mobility Concept: 42% (down from 61%)
  - Red Line capacity: 4,000 passengers/hour/direction
- **Park & Ride strategy:**
  - Connect PnR to Downtown and Red Line to NRG
  - PnR services operational 24/7; staging at Orange Lot 12 (50–60 buses)
- **Backup operations:**
  - 15–20 buses available in case of Red Line disruption
  - Potential for parallel bus service on game days

## Our Ask to RTCS

- Define role of each regional transit agency during FIFA World Cup
- Share transit operational plans to inform H-GAC's FIFA World Cup Scenario Planning. Ex. Service extension or new service to NRG on game days
- Inputs on "Transit Baseline" from all regional transit agencies to develop overall "Transit Mode Share" for FIFA World Cup
- Actions / Plans to leverage Commuter Transportation Pilot Program: Charter bus integration to improve access to transit during FIFA World Cup

# Open Discussion & Questions

## 4.2. Regional Public Transportation Coordination Plan (RPTCP)

Bennie Chambers III, H-GAC Staff

# Regional Public Transportation Coordination Plan Update

**Bennie Chambers III**  
**October 9, 2025**

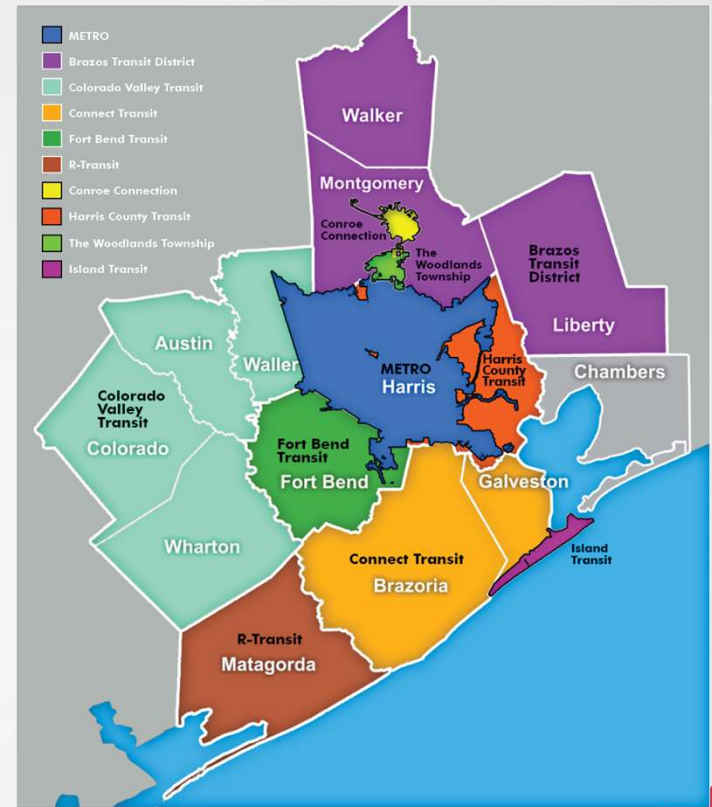

Regional Collaboration • Transportation Planning • Multimodal Mobility

# What is the RPTCP?

- Federally and state-mandated plan (TxDOT requirement every 5 years)
- Guides coordination of public and human service transportation in the 13-county Gulf Coast Region
- Supports funding eligibility for programs such as FTA Section 5310

# Purpose of the Plan

- Improve mobility and access for transportation-disadvantaged populations
- Assess unmet needs, service gaps, and duplication of services
- Facilitate stakeholder and public engagement
- Develop goals, strategies, and prioritized projects for coordination
- Align with TxDOT's Coordination Plan Guidebook (2025 update)

# Project Vision

“To build a coordinated, transit-for-all, and efficient regional public transportation system that connects people to jobs, healthcare, education, and essential services across the 13-county Gulf Coast region.”

# RPTCP Creates Real Improvements

- This plan provides recommendations that lead to improvements:
  - **Expanded mobility:** Launch of Fort Bend Transit's Needville demand-response service (2024) and Sugar Land microtransit pilot expanded options in suburban areas.
  - **Access for all users:** Regional Transit Information Study (RTIS) is improving how seniors, people with disabilities, and LEP residents find and use available services.
  - **Efficiency & cost savings:** Vanpool program extensions streamline regional commuter options and reduce duplication.
  - **Funding readiness:** The RPTCP supports projects like the Dayton Transit Study and CMAQ-funded pilots by aligning them with the RTP and TIP.
  - **Community impact:** Efforts such as Conroe Connection commuter services and Brazos Transit District expansions increase access to jobs, healthcare, and education across county lines.

# 4.3a. Congestion Management Plan (CMP) Interim Update

Alan Rodenstein, H-GAC Staff

# Congestion Management Process Update

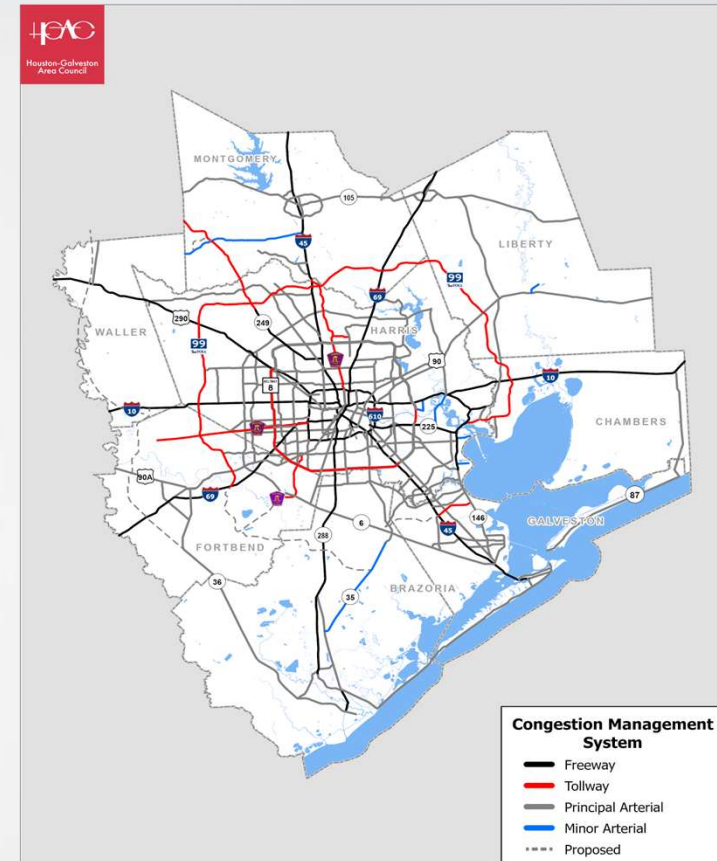

**Alan Rodenstein, AICP**  
**October 9, 2025**

Regional Collaboration • Transportation Planning • Multimodal Mobility

# Overview of the Congestion Management Process (CMP)

- The Federal Highway Administration (FHWA) defines congestion as ***the level at which the transportation system performance is no longer acceptable due to traffic interference***
- The Congestion Management Process describes the overall effort to manage congestion
- The Congestion Management Plan addresses congestion moving forward
- Metropolitan Planning Organizations are required to update the Congestion Management Process periodically

# Overview of the Congestion Management Process (CMP), Cont'd

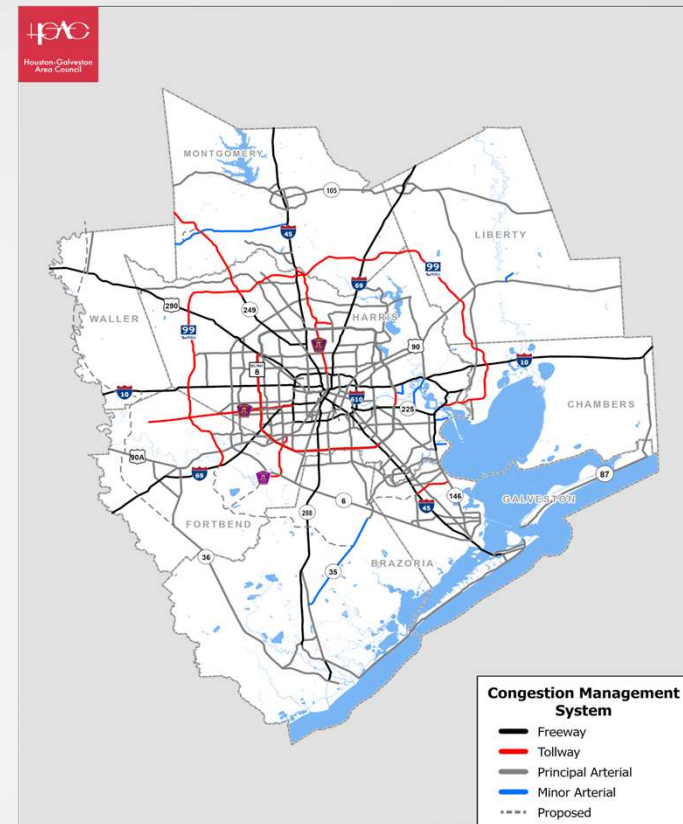

- The CMP provides a means to develop strategies and address the region's congestion challenges
- The CMP feeds into the long-term and short-term surface transportation plans:
  - ✓ Long-Term Regional Transportation Plan (RTP)
  - ✓ Ten-Year Plan
  - ✓ Short-Term Transportation Improvement Program (TIP)
- The process improves regional strategic decision-making and encourages project design to mitigate the conditions impacting congestion

# Regional Congestion Management Process

- 2008: Initial process developed
- 2015: Cambridge Systematics led the update
- 2021: Internal update to align with current practice
- 2025:
  - Congestion Management Principal Planner hired in 2025
  - Administrative edits, corrections. *No changes to the process itself*
  - Procurement underway for the next major update (2026) to be completed for inclusion with the 2050 RTP

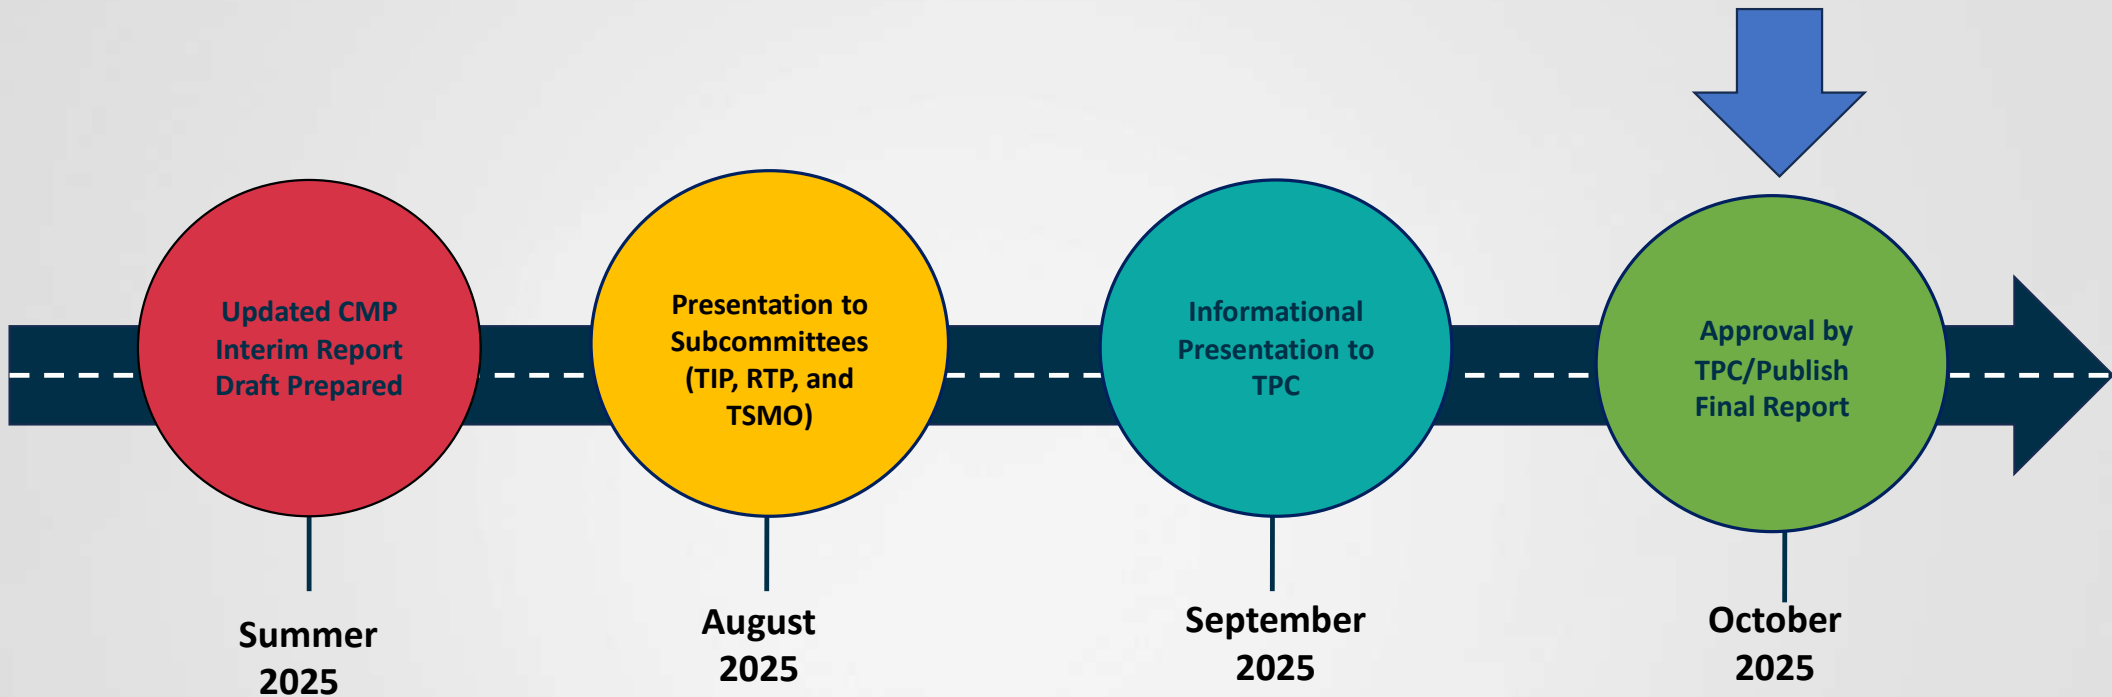

# Summary of Changes in 2025 Update

- Brings up to date the Congestion Management Network maps (extension of SH99, transit lines, bikeways)
- Adds three missing Congestion Management Analysis questions
- Adds link to a new online Congestion Management Analysis Form (No more PDFs)
- Removes discontinued software
- 2021 Final and 2025 Draft Final Update located at:

<https://www.h-gac.com/congestion-management>

# Congestion Management Plan 2025 – Interim Update

# 4.4. Dayton Transit Study

Alan Rodenstein, H-GAC Staff

# Dayton Transit Study

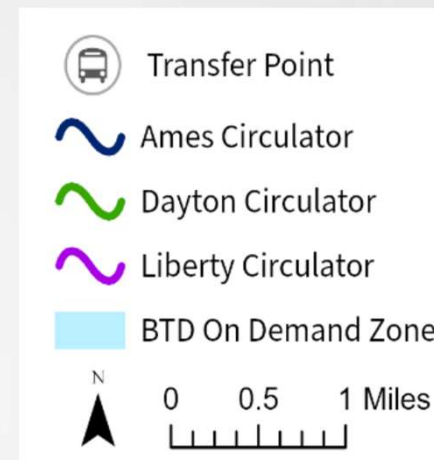

**Alan Rodenstein, AICP**  
**October 9, 2025**

Regional Collaboration • Transportation Planning • Multimodal Mobility

# Overview of the Dayton Transit Study

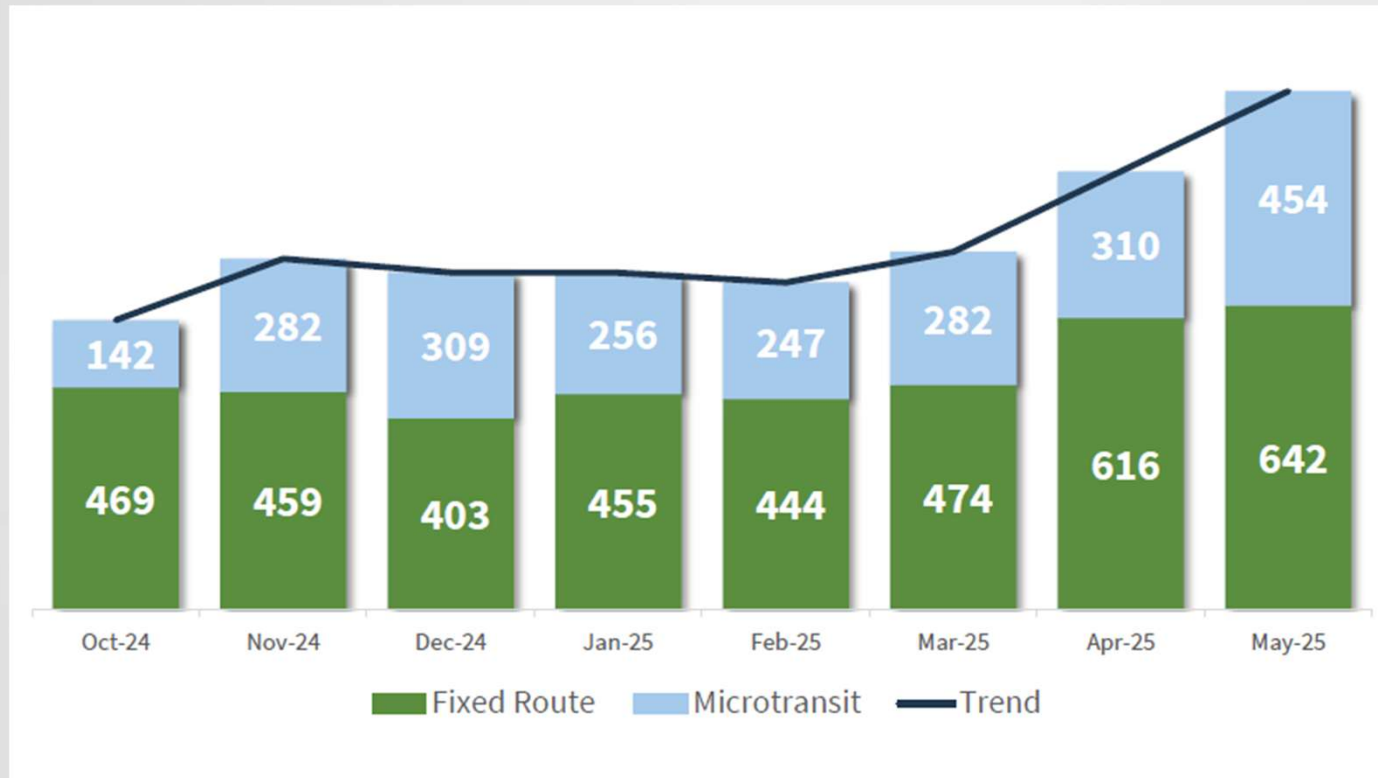

- 20-year vision for transit that looks at existing conditions and possible improvements
- H-GAC and City of Dayton collaborated
  - Consultant team led by Benesch Company
- More than 250 surveys, 30 workshop participants – positive towards transit
- A 60% increase in ridership on local services resulted from public outreach conducted *during the course of the study*
- Recommendations grouped into Short Term (0- 5 years) Medium Term (5-10 years), and Long Term (10-20 years) categories

# Existing Dayton Transit Services

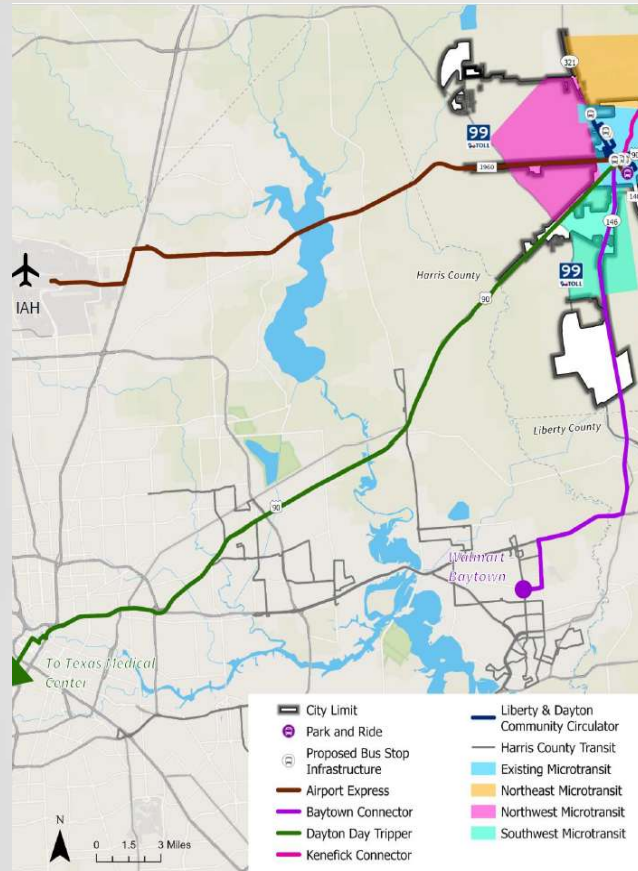

# Ridership Increase

# Future Service Recommendations

## Improvements to Existing Services

- Expand service hours (Fixed-Route)
- 60-minute frequency (Fixed-Route)

Saturday Service (Fixed-Route & Microtransit)

## Local Connection

- Kenefick Connector

## Regional Connectivity

- Dayton Day Tripper
- Airport Express
- Baytown Connector

## On-Demand Services

- Additional Microtransit Zones

## Capital & Policy

- Bus stop infrastructure
- Establish Park-and-Ride
- Mobile payment
- Social media campaign
- Partnering with City departments
- Travel training

# Questions?

THANK YOU

Alan Rodenstein

Principal Planner

# 4.5. US 90A Transit Corridor Study

Thomas Gray, H-GAC Staff

# US 90A Transit Corridor Study

**Thomas B. Gray, AICP**  
**October 9, 2025**

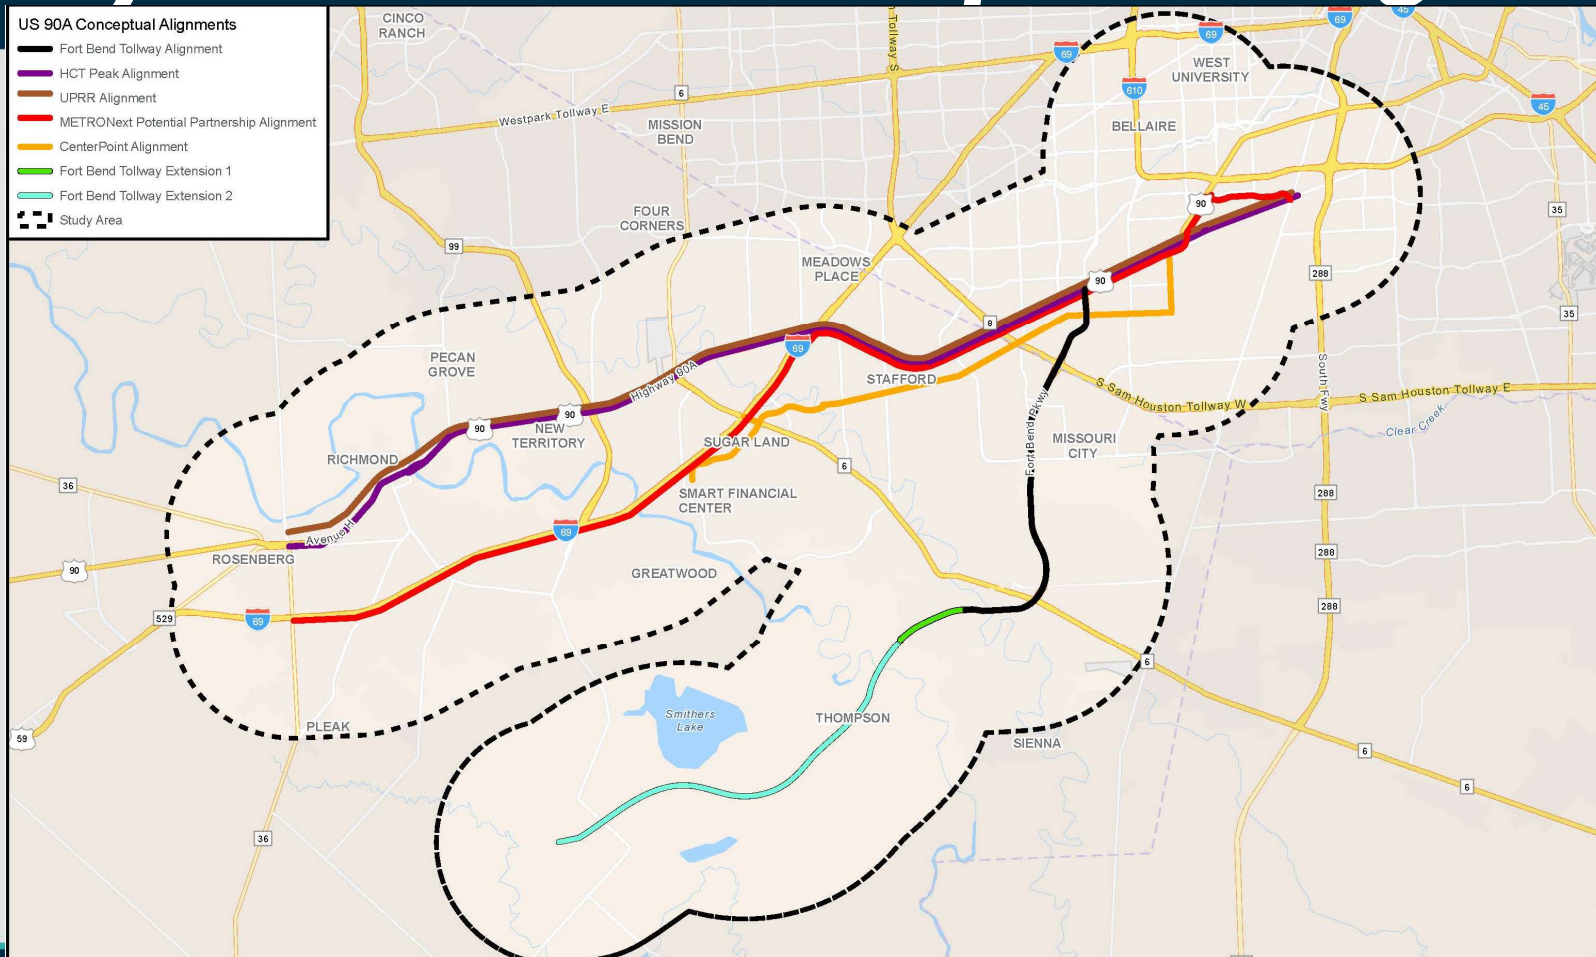

Regional Collaboration • Transportation Planning • Multimodal Mobility

# Project Goals

- Identify one or more high-capacity transit alternative(s) for the US 90A corridor that is technologically and economically feasible and could have significant benefits to mobility with the region.
- Alternative(s) can then be advanced by GCRD into more detailed study and analysis, with an eye towards implementation.

# Study Area and Conceptual Alignments

Regional Collaboration • Transportation Planning • Multimodal Mobility

# Two-Tiered Screening Methodology

## **Tier 1 Screening Criteria**

- Environmental Factors
- Population and Job Density
- Right-of-Way Availability
- Stakeholder Support

## **Tier 2 Screening Criteria**

- Ridership Potential
- Capital Cost
- Right-of-Way (ROW) Need
- Annual Operations and Maintenance (O&M) Cost

# Tier 1 Screening Results

	HCT Peak (US 90A)		Union Pacific Rail Road		US 90A to IH 69 (METRONext Potential Partnership)		CenterPoint (CenterPoint Easement to IH 69)		Fort Bend Tollway (US 90A to Fort Bend Tollway)	
Length (mi)	27.8 miles		27 miles		28.5 miles		28.4 miles		25.6 miles	
	Score	Description	Score	Description	Score	Description	Score	Description	Score	Description
Environmental Factors		2.9 miles in 100-year floodplain; high number of hazardous material and protected sites, particularly in Segment 5		1.5 miles in 100-year floodplain; high number of hazardous material and protected sites		1.8 miles in 100-year floodplain; high number of hazardous material sites and moderate number of protected sites		2.1 miles in 100-year floodplain; moderate number of hazardous material sites and minimal number of protected sites		6.1 miles in 100-year floodplain; minimal hazardous material sites and no protected sites
Density		Stronger population and employment density in eastern segments		Stronger population and employment density in eastern segments		Stronger population and employment density in eastern segments		Lower existing and future employment density than other alignments		Lowest existing and future population and employment density
Right-of-Way (ROW) Availability		Entire alignment location along US 90A (TxDOT) ROW with pinchpoints in Segment 5		Nearly entire alignment is located along Union Pacific Railroad ROW with pinchpoints in Segment 5		Majority of alignment is located along IH 69 (TxDOT) ROW		Alignment is split between CenterPoint ROW and IH 69 (TxDOT) ROW		Majority of alignment is located along Fort Bend Tollway (Fort Bend County Toll Road Authority)
Stakeholder Support		Strong stakeholder support		Minimal stakeholder support (Union Pacific RR staff have confirmed that sharing ROW is not part of their business model)		Very strong stakeholder support		Low stakeholder support (Stakeholder expressed concerns about conflicts with utilities and proximity to residences)		Moderate stakeholder support
Result	<b>Continue to Tier 2 Evaluation</b>		<b>Do not continue to Tier 2 Evaluation</b>		<b>Continue to Tier 2 Evaluation</b>		<b>Do not continue to Tier 2 Evaluation</b>		<b>Continue to Tier 2 Evaluation</b>

# ***Stakeholder and Public Involvement***

- **Steering Committee**
  - Gulf Coast Rail District, METRO, Fort Bend Transit, TxDOT, H-GAC
- **Stakeholder Committee**
  - Meetings held October 2024 and March 2025
- **Study website**
  - Survey and interactive map, links to presentations
- **Public Meeting**
  - Held April 2025 in Missouri City

# Public Involvement – Survey Responses

- Survey was hosted on H-GAC Engagement HQ website from fall 2024 through January 2025
- **922** Survey Responses – **2<sup>nd</sup> largest response since H-GAC began using EngagementHQ platform**
- **97%** of participants travel alone along the corridor
  - Primary destinations are the Texas Medical Center (36%) and Downtown Houston (23%)
- Biggest Concerns were **Traffic Congestion** (82%) and **Lack of Transportation Options** (58%)
- **61%** wants an expansion of the current bus routes and public transit options
- **62%** wants improved signal timing

# ***Public Involvement – Public Meeting***

- Held April 23, 2025 at Missouri City Library
- 62 attendees including key stakeholders
- Presentation on the study followed by open house format
- Comments provided via comment cards and notes on corridor map
- Interest in high-capacity transit to the area
- Following public meeting, city councils of Missouri City and Stafford passed resolutions in support of specific alignment alternatives

# Potential Phasing

Potential Connectivity with IH-69 HOV facility

New METRO Missouri City Park and Ride

# Requiring Further Study

- Technology/Mode
  - Type (e.g. LRT, BRT, etc.) and propulsion
  - Where are they stored and maintained?
- Connectivity to METRO service
  - Interlining – METRORail Red Line track capacity
  - Transferring – Platform and vehicle capacity
  - Route extension – Alternative alignment into TMC
- Service Concepts – Commuter vs Express
  - Commuter service: fewer stops (3-5 mile spacing) – faster travel time but lower ridership/connectivity
  - Express service: more stops (2-3 mile spacing) – better ridership/connectivity but slower travel time

# Questions?

Thomas B. Gray  
Principal Planner
