Please notice the total costs for this project summary are estimated based on the assignment of an individual project's total cost to one and only one activity. Although a specific project scope may include many types of expenditures (capital, operations, maintenance as well as system preservation costs), the dollar expenditures for each project has been placed in one and only one category for purposes of this summary table. Cost for Projects includes Utility and ROW and is in Year of Expenditure dollars. Inflation factors vary according to agency.

* In cooperation with the Federal Highway Administration, TxDOT developed statewide programs identified by statewide CSJs to maximize the provisions for grouping projects that are not determined to be regionally significant in one line item, as allowed for in Title 23 USC Section 135 Statewide Planning.

As these projects are not regionally significant, they are no longer listed individually within this appendix but their costs are included to document expenditures being made to adequately maintain the federal-aid highway system.

Please see Appendix 'J' of the Transportation Improvement Program for the latest listing of Grouped CSJ projects (<http://h-gac.com/taq/tip>).
