

# **CHAPTER 5**

## **LOCALLY FUNDED REGIONALLY SIGNIFICANT PROJECTS**

**This page left blank intentionally.**

**LOCALLY FUNDED REGIONALLY SIGNIFICANT PROJECTS  
FOR THE  
2002-2004 TRANSPORTATION IMPROVEMENT PROGRAM**

Locally funded regionally significant projects are those projects which should be considered regionally significant, and should be considered to have a significant change in design concept and scope from the effective Metropolitan Plan (MTP) and Transportation Improvement Program (TIP). Regionally significant projects include, at a minimum, all facilities classified as principal arterial or higher, or fixed guideway systems or extensions that offer an alternative to regional highway travel. Also, these projects include minor arterials that are included in the travel demand modeling process which serve significant inter-regional and intra-regional travel, by connecting rural population centers not already served by a principal arterial, or by connecting with intermodal transportation terminals not already served by a principal arterial. A significant change in design concept and scope is defined as a revision of a project in the MTP or TIP that would significantly affect model speeds, vehicle miles traveled, or network connections. In addition to new facilities, other examples of locally funded regionally significant projects may include: changes in the number of through lanes or length of project (more than one mile); access control; the addition of major intermodal terminal facilities (such as new international bridges, park-and-ride lots, and transfer terminals); and the addition/deletion of interchanges or changing between free and toll facilities.

The following pages list projects considered as locally funded regionally significant projects for the Houston-Galveston TMA.
