
**Public Meeting Agenda
for the
Clear Creek Bacteria
Total Maximum Daily Load (TMDL) Project**

**Wednesday, April 5, 2006
6:00 PM – 8:30 PM**

The purpose of the meeting is to inform the public of the status of an on-going TMDL Project in the Clear Creek watershed (Clear Creek Tidal, Segment 1101; Chigger Creek, Segment 1101B; Clear Creek Above Tidal, Segment 1102; Cowarts Creek, Segment 1102A; Mary's Creek/North Fork Mary's Creek, Segment 1102B and Robinson Bayou, Segment 2425C). The TCEQ would like to provide an opportunity for stakeholder input on the project and begin to solicit the formation of a balanced Clear Creek Watershed Advisory Group that is representative of the watershed stakeholders. This meeting will focus discussions only on the Clear Creek Bacteria TMDL Project. If other issues arise that are not pertinent to this project, we will see that they are passed along to the appropriate individual(s).

- 6:00 Welcome (Carl/MJ)
- Introductions
 - Review purpose of meeting and agenda
 - Present ground rules for meeting
