Innovation Trail: [Select Your Region](#) > Innovation Index

About the Index

The Innovation Index consists of five components.

1. Human Capital: 30%
2. Economic Dynamics: 30%
3. Productivity and Employment: 30%
4. Economic Well-Being: 10%
5. State Context (for reference only)

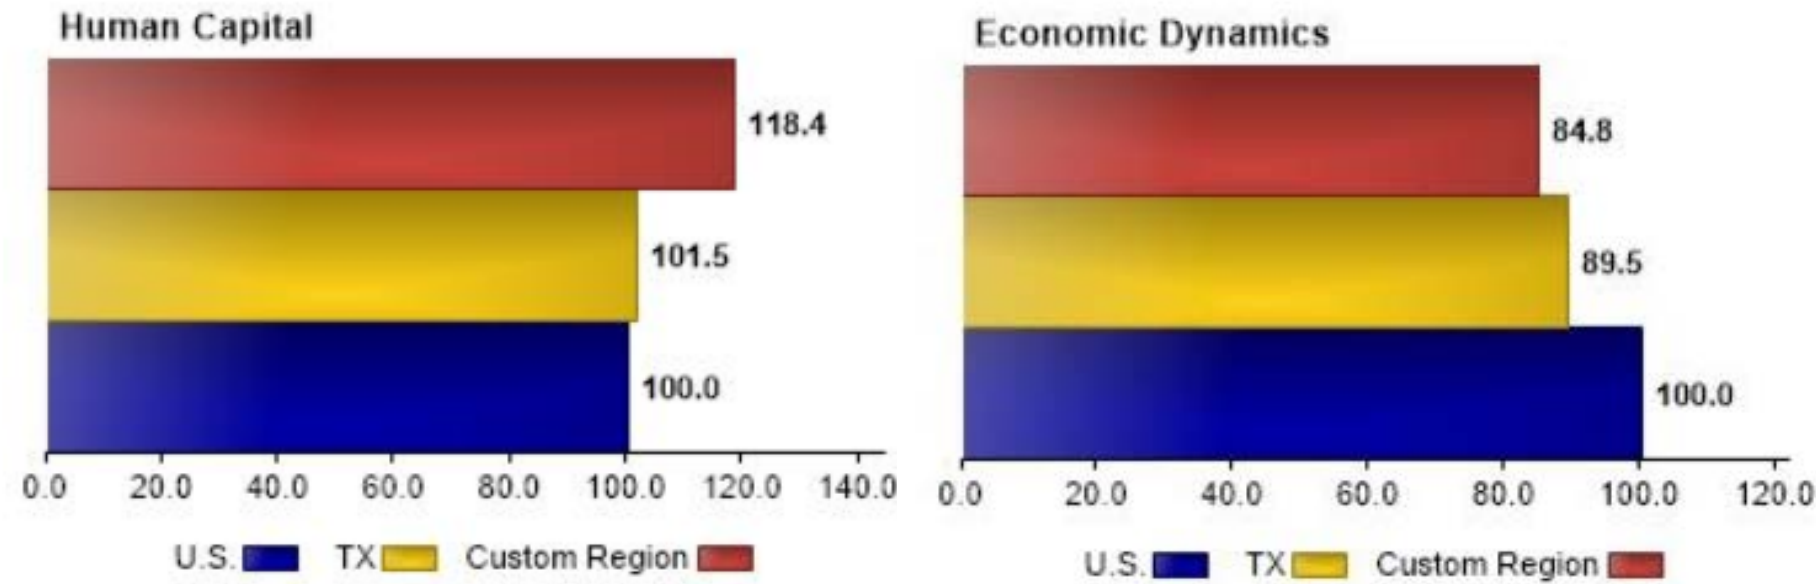

Innovation Index

[View Component Graphics and Data](#)

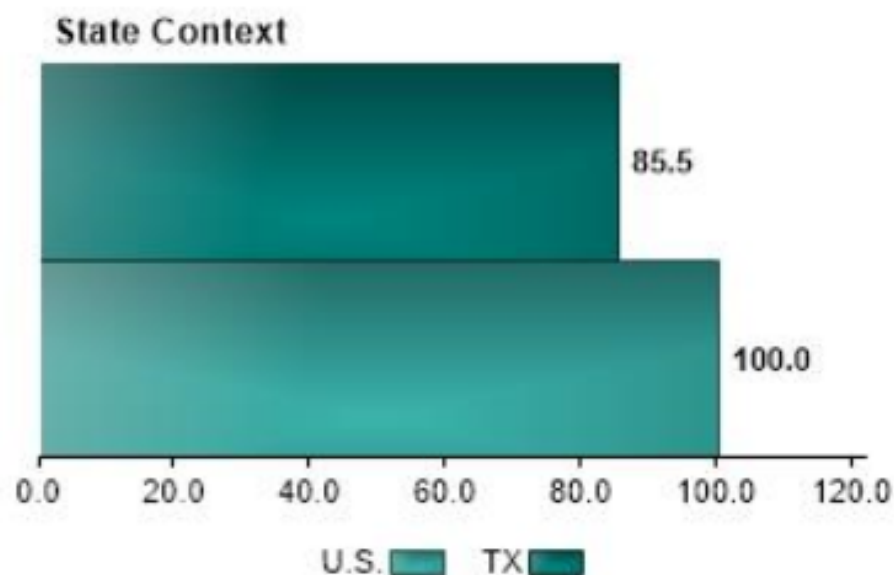

Inputs and Capacity

The ability of the population and labor force to innovate is captured in 2 component indexes that include inputs into local economies.

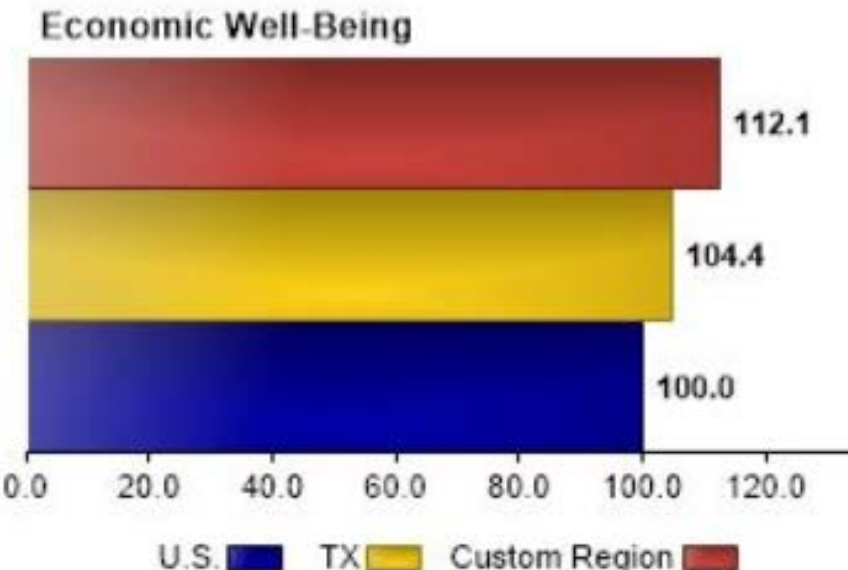

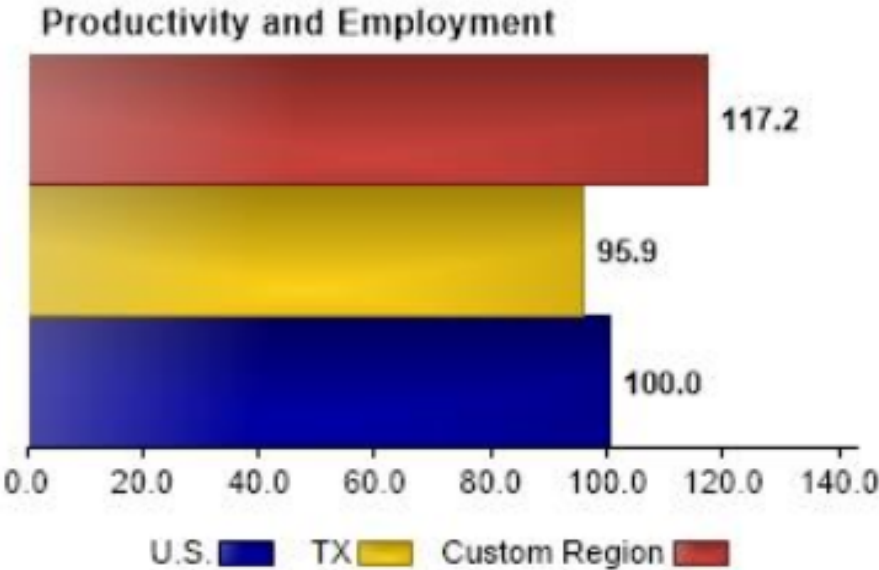

State Context

A measure of the resources available in a state to entrepreneurs and businesses.

Outputs

Direct outcomes and economic improvements of innovative activities are displayed in the output indexes.

Living in Houston

Walk Score
44

Transit Score
37

Bike Score
49

Houston has sparkling new high-rises, historic architecture with wrought iron balconies, parks and museums, and plenty of shopping. It's the fourth largest city in the US. The Johnson Space Center is in Houston, and the Rothko Chapel, a serene facility housing the work of one the masters of American Art.

In Houston, you're inside the Loop (Interstate 610) or inside the Beltway, or out in the suburbs. There are five main business districts, two Chinatowns, and day trippers think nothing of heading to [Galveston](#) on the Gulf Coast. Houston is a commuter's town, you may find a walkable neighborhood but most likely still have to drive to work.
