PART I – GENERAL INFORMATION

Houston-Galveston Area Council (H-GAC) Background

The Houston-Galveston Area Council (H-GAC) is the region-wide voluntary association of 133 local governments and local elected officials in the 13-county Gulf Coast Planning region of Texas. Local elected officials organized H-GAC in 1966 after authorization by State enabling legislation. Its service area is 12,500 square miles and includes more than 7-million residents. H-GAC is governed by a 36-member Board of Directors composed of local elected officials, who serve on the governing bodies of member local governments. All H-GAC programs are carried out under the policy direction of its Board of Directors. H-GAC's mission is to serve as the instrument of local government cooperation, promoting the region's orderly development and the safety and welfare of its residents. H-GAC is the regional organization through which local governments consider issues and cooperate in solving area-wide problems. Agency programs emphasize local government concerns, such as transportation, air and water quality, criminal justice, demographic analysis, mapping programs, and intergovernmental purchasing. H-GAC also serves its citizens through workforce development programs, services to the aging and elderly, and small business finance programs.

Metropolitan Planning Organization (*MPO*): Designated by the State of Texas as the MPO for the eight-county Houston-Galveston region, the H-GAC Transportation Department is responsible for transportation planning and policy-making, ensuring that expenditures for transportation projects and programs are based on a continuing, cooperative, and comprehensive planning process.

Solicitation Background

Since 2013 H-GAC has maintained permanent counting equipment on off-street trails for measuring the number of trail users each day. This effort began with two counters and in 2017 two additional sites were added. H-GAC also purchased six mobile counters intended for short duration counts (no longer than one month) to measure both bike and pedestrian traffic at the desired location. This equipment is available to any interested government or non-profit organization in the eight-county area, as well as internal use by H-GAC staff.

Interest in this program has grown steadily since its inception. H-GAC currently receives regular requests for both historical data from permanent counters and use of the mobile counting equipment. Several organizations have even begun conducting counts at regular intervals throughout the year. With this interest and growth H-GAC realizes the need for expansion of the program. This need for expansion has led us to examine what is, and more importantly what is not, working with the program's current configuration.

Objective/Purpose

H-GAC is seeking qualified contractor(s) to provide permanent and mobile counting equipment for measuring bicycle and pedestrian traffic. The requested products and services are described in detail in Part II.

Scheduled Time Frame

H-GAC intends to award one or more Indefinite Delivery / Indefinite Quantity (IDIQ) contracts for the services requested under this Solicitation. The term of this contract shall be for a period of one (1) year. H-GAC may, at its option, extend the contract for up to two (2) additional one-year terms. H-GAC reserves the right to extend and/or expand the scope of this contract, subject to H-GAC Board of Directors approval and/or additional funding availability.

No Guarantee of Usage

H-GAC makes no guarantee of volume or usage under any contract resulting from this Solicitation. Services will be requested and contracted on an as needed basis and the type and value of each assignment will vary.

Post Award Meeting

H-GAC reserves the right to require the awarded Contractor attend a post award meeting with H-GAC staff and/or other designated persons at H-GAC offices in Houston, Texas within thirty (30) calendar days after the award. The purpose of the meeting will be to discuss the terms and conditions and to provide additional information regarding the work tasks and requirements. Awarded Contractor and H-GAC will identify specific goals, strategies and activities planned for meeting program objectives.

Pre-Award Audit

Due to the amount and type of funding programmed for this project, H-GAC requires that a pre-award audit be conducted before the execution of a contract. The information required for this audit, in addition to a draft contract and detailed scope of work, is:

1. Detailed annual budget
2. 12-month project Schedule/Timeline
3. Itemized cost estimate by personnel job title (including hours), benefits, overhead, travel, equipment, supplies, printing and other direct expenses; and
4. Support data for the benefit and indirect rates (overhead) based on audited costs.
5. Federal OMB Form 60

Study Area/Service Region

PART II – SCOPE OF WORK

H-GAC's current counting equipment is from different manufacturers and has different data management interfaces. Permanent counters utilized are Eco Counter's Multi Range Urban Multi; mobile counters utilized are TRAFx's Infrared Trail Counter. Moving forward it is essential to be able to view, download, and create data dashboards in one interface. Over the course of the program, requests have been received from individuals outside H-GAC for various data such as, but not limited to, number of pedestrians and cyclists broken down by daily and monthly totals, and direction of traffic. Most users request data be in tabular format (e.g. CVS or Excel) rather than the PDF reports featured on H-GAC's website. H-GAC staff handle these requests on a case-by-case basis. Moving forward it is necessary that external users have an interface to both visualize & retrieve data without the intervention of H-GAC staff.

The climate of the gulf coast region presents challenges to the longevity of any long-term installation of equipment. Many months of the year have extreme heat and humidity with temperatures regularly exceeding 90 degrees Fahrenheit on most afternoons from May to September. Additionally, the location of the region makes it susceptible to hurricane force winds and flooding. Equipment must be able to endure these forces of nature and have comprehensive warranties.

H-GAC staff handle the set-up and removal of mobile counting equipment. To minimize staff involvement, H-GAC requires mobile counting equipment with an approachable learning curve and direct support to the end user.

Minimum Requirements/Specifications – Permanent and Mobile Counting Equipment

Data Reporting/Interface Requirements

- Management of new and existing equipment from a single customizable dashboard interface
- Ability to directly show data from the counter management portal on the H-GAC website through embedding or other options, and to seamlessly integrate data with ArcGIS tools. This integration would go beyond an export/import function to allow real-time viewing of data
- Ability for H-GAC, partners and the general public to retrieve data related to the counts
- Error detection or notification of anomalies in the data (e.g. the system would provide automated notification via email or other mechanism of any sudden spike or drop-off in activity relative to past data)
