

**Facility: Emissions Benefits**

The spreadsheets provided are insufficient to calculate the emissions benefits for this project. There is no option for a new transit facility in any of the templates provided. The active transportation emissions template only has dropdown options for infrastructure such as sidewalks and bicycle lanes. The roadway emissions template only provides the options for roadway improvements, ITS Infrastructure and HOV Lanes, and the new transit vehicle purchase does not fit the project scope. This project is a facility only. We request that H-GAC calculate the emissions benefits for this project.
