

## Planning Factors - Includes Life Cycle Maintenance Plan (Max 10 Points)

1. Does the proposed project application include Life Cycle Maintenance strategies/plan? **Yes**
  - a. Please provide adopted asset management plan.

This plan acts as a life cycle maintenance plan. The Traffic Management System will consistently review software updates, systematically over a 10 year period, and will actively review device operation and ensure replacements for DMS, & CCTV over a life cycle of a 10 year period. The City will maintain connectivity and will use the Traffic Management System to be aware of possible upgrades, and identify locations with antiquated technology that must be updated, as new innovation becomes mainstream.
