The purpose, need and description sections of the application have been completed. A project location map has been uploaded and the application has been saved.

On behalf of League City and Webster, I request H-GAC's assistance with modeling for travel time savings projections. The cities would also like the most recent crash data for FM 518, FM 528, Bay Area Blvd. and IH 45 in the study area as indicated by the project location map.

If possible, city representatives would like to meet with H-GAC staff to review the application at an appropriate time.

Thank you.
